### SPLIT CLAMP

The newly developed universal skin fastener from MONTANA

- Chromium stainless steel clip for attachment to the board TIP with tear-resistant tarpaulin material.
- Chromium stainless steel clip for attachment to the board TAIL with specially developed bar-adjustable rubber band.

**The MONTANA SPLIT CLAMP** is impressive for its simplicity and versatility. The climbing skin is connected to the SPLIT CLAMP with tear-resistant tarp material and attached at the front. A special rubber band is sewn into the tail end of the climbing skin to fit the adjustable SPLIT CLAMP perfectly to the length of the split board.

- Flexible adjustable to different splitboards
- With the new Split Clamp, your skin is fastened tightly to your Splitboard and the snow is prevented from getting between the skin and covering.
- The ergonomic cut of the skin leads to a superior snow displacement.
- A lightweight fastening system that fits most splitboards, with different widths and tip curvature
