

WASH YOUR SKINS FUSIONTEC ADHESION

- To clean dirty adhesives
Grab your dirty skins and prepare a bowl of lukewarm, soapy water

- Place the adhesive in the water

- Clean the adhesive surface with a sponge

- Rinse the adhesive surface with clean water and hang up to dry
- The Skinny protective stocking or a microfiber towel can be used to speed up the drying process.

SKINNY FOR YOUR PERFECT SKI TOUR

- In wet snow conditions, water residue can remain on the adhesive side, weakening the climbing skins' sticking properties.
- The Skinny protective stocking from MONTANA guarantees you a safe and successful ski trip, with no loss of adhesive strength.

- If there is water residue on the adhesive surface, lightly dab it off with the Skinny protective stocking

- Dry your ski base efficiently using the Skinny protective stocking

- The Skinny protective stocking is the perfect solution for adhesion and for your ski base
