SKI CLAMP

The newly developed universal skin fastener from **MONTANA**

- Made of chromium stainless steel.

- Easy to handle.

- Flexible adjustable to different ski tips.

- Eliminates the need for a wide selection of clips for the variety of widths of ski tips.

- The Ski Clamp fits any current touring ski.

- With the new Ski Clamp, your skin is fastened tightly to your ski and the snow is prevented from getting between the skin and covering.

- The ergonomic cut of the skin leads to a superior snow displacement.

- Due to the aerodynamic cut MONTANA enables easier gliding and saves on weight.

- A lightweight fastening system that fits all current touring skis, with different widths and tip curvature.
